## DETAILED ACTION

### *Drawings*

1. The drawings were received on 12/17/04. These drawings are approved. The drawing objections from the previous Office Action are withdrawn.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Porter, III et al. (US 4,367,604). Porter shows a sign comprising transparent plastic sheet (30), translucent plastic sheet (35), and opaque material (11). The plastic sheet (30) is the front side and the sheet (35) is the translucent color provided thereon. The housing (11) is the rear side. It is provided against the sheet (30) along the edges of sheet (30). The housing (11) opaquely covers the edges of the sheet (30) while sparing the symbol field of sheet (30). Porter does not disclose the material of housing. Injection molded plastic is a well known and common material used in light boxes. Since Porter does not disclose a material for housing (11) one wishing to make and use the Porter apparatus would necessarily have to decide upon a material to use. Therefore it would have been obvious to one having ordinary skill in the art at the time

Art Unit: 3617

the invention was made to modify Porter by making the housing (11) from injection molded plastic. The motivation would be to use a well known, inexpensive, and lightweight material for the housing.

4. Claim 14, the housing (11) facilitates that light passes only through the symbol field of sheet (30).

#### ***Allowable Subject Matter***

5. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1-8 and 14 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hjaltason ('322) shows a backlit sign with a transparent plastic sheet, a translucent portion, and an opaque backing.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3617

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
